

The image displays three UML class diagrams for a system, organized into three packages: Model, Controller, and View.

**Model Package:**

- Card:** Attributes: cardId, title, author, year, isbn, description, coverImage, keywords, tags, createdAt, updatedAt.
- Page:** Attributes: pageId, cardId, content, order, createdAt, updatedAt.
- Book:** Attributes: bookId, title, author, year, isbn, description, coverImage, keywords, tags, createdAt, updatedAt.
- Labry:** Attributes: labryId, title, author, year, isbn, description, coverImage, keywords, tags, createdAt, updatedAt.
- CardController:** Methods: createCard, updateCard, deleteCard, getCard, listCards.
- PageController:** Methods: createPage, updatePage, deletePage, getPage, listPages.
- BookController:** Methods: createBook, updateBook, deleteBook, getBook, listBooks.
- LabryController:** Methods: createLabry, updateLabry, deleteLabry, getLabry, listLabrys.

**Controller Package:**

- CardController:** Methods: createCard, updateCard, deleteCard, getCard, listCards.
- PageController:** Methods: createPage, updatePage, deletePage, getPage, listPages.
- BookController:** Methods: createBook, updateBook, deleteBook, getBook, listBooks.
- LabryController:** Methods: createLabry, updateLabry, deleteLabry, getLabry, listLabrys.

**View Package:**

- CardView:** Methods: renderCard, editCard.
- PageView:** Methods: renderPage, editPage.
- BookView:** Methods: renderBook, editBook.
- LabryView:** Methods: renderLabry, editLabry.

**Relationships:**

- Associations:**
  - Card (1) to Page (2): multiplicity 1 at Card, 2 at Page.
  - Page (1) to Book (1): multiplicity 1 at Page, 1 at Book.
  - Book (1) to Labry (1): multiplicity 1 at Book, 1 at Labry.
  - Card (1) to CardController (1): multiplicity 1 at Card, 1 at CardController.
  - Page (1) to PageController (1): multiplicity 1 at Page, 1 at PageController.
  - Book (1) to BookController (1): multiplicity 1 at Book, 1 at BookController.
  - Labry (1) to LabryController (1): multiplicity 1 at Labry, 1 at LabryController.
- Generalizations:**
  - CardController is a generalization of CardController.
  - PageController is a generalization of PageController.
  - BookController is a generalization of BookController.
  - LabryController is a generalization of LabryController.
- Aggregations:**
  - CardController aggregates Card.
  - PageController aggregates Page.
  - BookController aggregates Book.
  - LabryController aggregates Labry.
